Our Work Summary

Detech is a subscription-based software company that specializes in platform engineering, AI-powered solutions, and immersive technologies like AR/VR. Their team helps businesses scale and innovate by delivering fast, customized development across web, mobile, and cloud platforms.

Our Project Summary

Detech has delivered impactful digital solutions across diverse industries. Key projects include a volunteer management system, an AI-powered student recruitment platform, an e-commerce site focused on UX, and an intuitive investment app. Each project showcases their focus on innovation, usability, and results-driven development.

VolunTrack Nexus

Volunteer management system for Sirakukal Amaiyam.

Authentz

AI-powered platform for student recruitment and visa prediction.

Kunam Dry Fish

E-commerce site with a focus on user experience.

100 Bucks

Investment platform with intuitive design and tools.

Timeless Mahajana

A digital archive project dedicated to preserving and sharing ancient knowledge and cultural heritage.

Delft Media

A news and media website delivering current local and regional news content.

Agro Plus

A sustainable agriculture solutions platform offering modern farming technology, consultancy, and eco-friendly services to enhance productivity and climate resilience.

TAPT

A mobile application project about HR Management.

Our Skills

Web & Mobile App Development

We build responsive, user-friendly apps for both Android, iOS, and the web.

AI & Cloud Solutions

We develop intelligent systems powered by AI, hosted on scalable cloud platforms.

Custom Platform Engineering

From scratch to scale-we design and develop platforms tailored to your business.

UI/UX Design

Clean, intuitive designs that focus on user experience and brand identity.
